

Facts about HoloVit Screen

HoloVit Holography screen is your personal holographic screen that changes pictures and videos to 3D holograms.

It works like a reflector when used with tablets, smartphones, laptops and TVs.

It comes with links to holographic videos and 3D Hologram Effect App.

It is designed to work without the need of a projector or special equipment.

It requires no power and when set at the optimal distance holograms can be viewed even in brightly-lit rooms.
