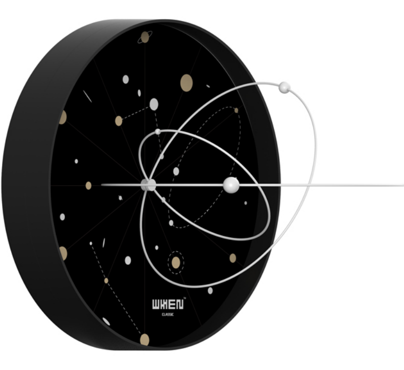
The Solar System Clock

22:00



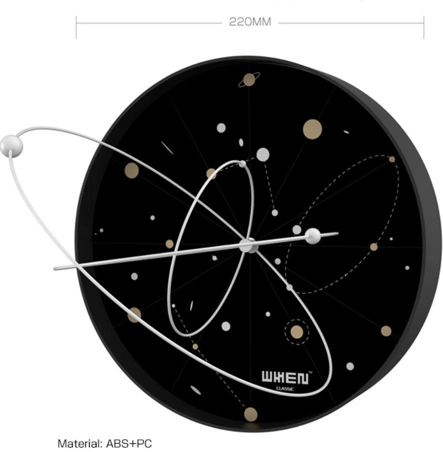
03:46

19:26

05:07

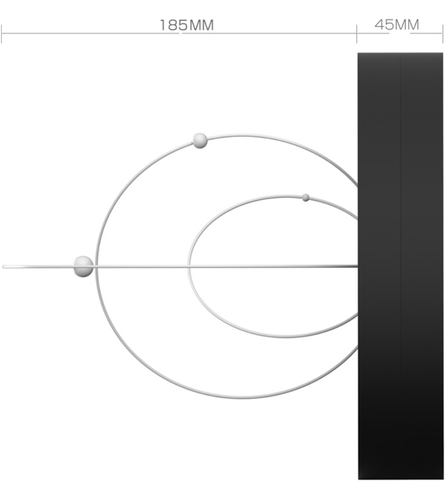
15:00

產品編號 Product No.：WW-C-004　太陽系時鐘 Solar System Clock



Material: ABS+PC
環保ABS+PC材質，堅固耐用

正面/FRONT

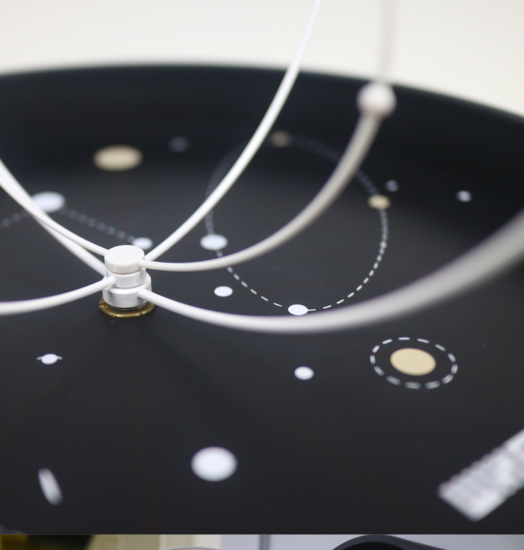


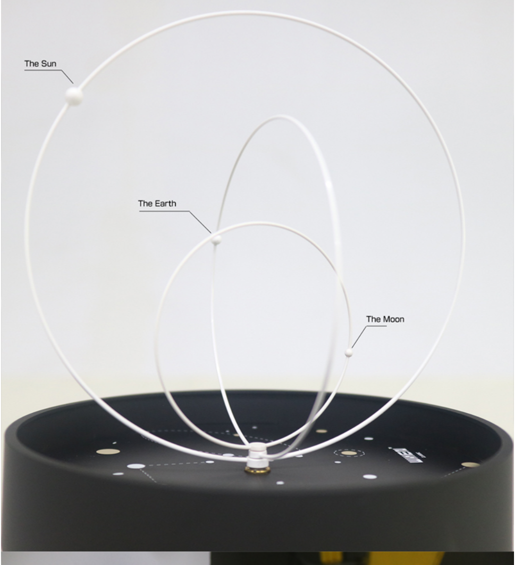
厚邊框設計，表面橡膠漆噴塗，品質感強
Outer frame black rubber paint coating quality sense advanced

側面/SIDE

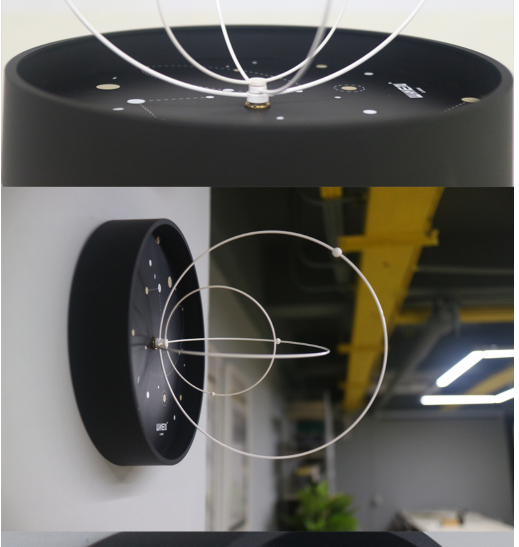
專業挂墻孔，懸挂安裝更穩定
日本進口靜音掃秒機芯
Wall-mounted hole installation is stable, Japan SUZUKI silent movement

背面/BACK





The Sun
The Earth
The Moon



Installl Instruction

1st edition The solar system clock at 2013

地球上最神秘的事物就是时间。
地球围绕着太阳转动,月亮围绕着地球转动形成了现在我们的时间标准。“太阳系时钟”生动的还原了时间和星球转动之间的联系。秒针上的小球代表月亮,分针上的球代表地球,时针上的大球代表了太阳。指针不同的转动速度生动还原了三颗星球的运动状态。
钟面上的12颗不同位置的金色星球图案代表了12个小时刻度,从正面看环状指针上的球体指向的位置为当前时间。
“太阳系时钟”也可以从侧面估计出时间,一般的时钟指针基本是贴附于钟面板,但是“太阳系时钟”的指针是空间形态,可以在时钟的任何角度观察到三颗球的位置来估计当前时间。
体现时间本身就是个空间的概念。

Time is the most mysterious thing on earth.
Time exists because the earth revolves around the sun and the moon revolves around the earth. The solar system clock vividly restores the connection between time and planet rotation. The little ball on the second hand represents the moon, the ball on the minute hand represents the earth and the big ball on the hour hand represents the sun. The different rotation speed of the pointer vividly restores the moving status of three stars.
The 12 golden star patterns located on different place on clock represent 12 hour scales. Looking from the front side, the ball on the pointer points to the current time.
The solar system clock can also estimate time from the side. Normal clock hands are basically attached to the clock panel, however, the hands of the solar system clock are spatial form. You can estimate the current time by observing the position of the three balls at any angel of the clock. It can reflect time is a concept of space.
