

THE ICONDESK

A timeless design desk made from high quality materials. The simple design language fits perfectly in this time, with sustainability and quality leading the way.

Oiled solid wood in combination with thermoformed corian are the body that is supported by 4 brushed stainless steel legs.

Solid wood drawers that can be opened in a smooth way, whereby the drawers of the 2 drawers desk are supported by luxurious drawer guides for smooth closing.

The corian is polished all round and can be polished again afterwards (in the case of slight damage that may arise in the course of time). The solid wood is oiled and may, as maintenance, be oiled several times a year, so that the material will remain as new.

The designer has put his signature on the bottom of the desk. The office is provided with a serial number with year of production.

SMOKED OILED OAK

NATURAL OILED OAK

OILED WALNUT

CORIAN GLACIER WHITE

It started with the design for a desk with an integrated computer where all wires and parts had to be tucked away. In this way, the form of a table with a small structure on one side was created. Van der Kley liked this shape so much that he used it as a starting point for a series of office tables, which are now produced by Iconicals.

The Icon desks are available in various finishes with one or with two drawers. The flowing lines in the design are beautifully emphasized by the material Corian which is ideal for such applications. The cool, smooth Corian compliments the warm timber of the drawer fronts and the inner part of the tabletop.

The Icon desk stands on elegantly shaped legs of polished stainless steel, which gives it a somewhat light footed character.
