

Light Fields | Fire of Form

Limited edition of 12

Materials:

Inkjet prints, glass, LED sheet, electronics, European Oak

Dimensions:

310 x 310 x 55 mm

Installation

All stand-alone Light Fields can be hung on a wall using a single hook per frame, or placed on a shelf as self-standing objects.

Operation:

While plugged in, short-touch the black round dimmer on the top to switch the artwork on or off. Long-touch the dimmer to lower or increase brightness.

Maintenance:

The glass can be cleaned with a microfibre cloth and a mixture of alcohol & vinegar or any glass cleaner that works for you. The frame can be lightly sanded (grain 600) and oiled (Osmo Polyx-Oil, clear satin) if the wood starts to become pale over many years.

Durability:

All parts are designed to be durable and timeless with eye for detail and sustainably sourced materials. The dimmable LED light and electronics are CE certified and very robust in its design. The longevity of LED light sheet is more than 50,000 hours (11 years at 12 hours/day). All parts can be replaced.
